Finesse™

Dinnerware

Full line of plates and bowls that are visually appealing and compliments food presentation.

Durable heavyweight construction and deep profile is ideal for heavy or saucy foods.

Finesse™ dinnerware is microwavable and can be used under heat lamps for food staging and warming.

Addresses a variety of food applications; from hot soups and warm entrees to cold desserts and meals.

Clear PET dome lids for take-out foods or meal transport are available, and sold separately.

Finesse™ dinnerware is made from recyclable polypropylene (PP) ♻️. With a lower carbon footprint than similar polystyrene products, PP is recognized as a greener disposable solution for the eco-conscious customer.

This line addresses the need for alternative plastic material solutions in communities that have banned polystyrene (PS) ♻️.

Additionally, Finesse™ plates and bowls are made with a natural mineral additive, requiring less plastic material than a standard PP item, to provide a more eco-friendly product.
