**Waddington North America** has seven manufacturing locations located throughout North America and is proud to be a part of Novolex. Novolex develops and manufactures diverse packaging products for multiple industries in the foodservice, delivery and carryout, food processing and industrial markets that touch nearly every aspect of daily life.

The Novolex family of brands provides customers with innovative food and delivery packaging and performance solutions products for their business needs today while investing in research and development to engineer more sustainable choices for the future. With more than 10,000 employee families, Novolex operates 55 manufacturing facilities in North America and Europe, including two world-class plastic film recycling centers.

# WADDINGTON NORTH AMERICA™

A NOVOLEX BRAND

Our commitment to sustainability drives us to innovate packaging choices to reduce the impact that Novolex—and our customers and their consumers—have on the environment. This vision comes to life every day through our focus on product development, efficiency and safety in our operations, and partnerships with customers, suppliers, communities and policy makers. By operating our businesses responsibly and investing in our people and communities, we create more opportunities to be responsible corporate citizens. Learn more about our approach to sustainability in the Novolex Sustainability Report, available at [www.novolex.com](http://www.novolex.com).

**We continue to innovate and educate our customers on more sustainable choices.**

**Our 2021 catalog features:**

**Expanded line of rPET Products:** Using recycled PET (rPET) helps reduce the environmental impact of our products and supports the circular economy. We now feature products made with 20-100% rPET incorporating post-industrial (PI) and post-consumer recycled (PCR) content with an option for 100% PCR rPET. We call our expanded line Eco Blend®. Inquire about our growing capabilities in this area to learn more about how we can tailor solutions to meet your specific sustainability requirements.

## ECO BLEND® PURA

Our products manufactured with **Eco Blend® Pura** rPET are made entirely from post-consumer recycled (PCR) rPET. The range of thermoformed trays, collation trays are also fully recyclable and suitable for packaging a wide range of food items including meat and fish, baked goods, prepared food, soft fruits and salads.

## ECO BLEND® 100

Products manufactured from **Eco Blend® 100** rPET are made from 100% recycled content as a blend of post-industrial (PI) and post-consumer recycled (PCR) content. This offers customers the same superior shelf display, food safety and environmental benefits as the Eco Blend® Pura line but at a slightly lower price point.

how2recycle.info

### How2Recycle® Consumer-focused labeling

At Novolex, part of our commitment to sustainability is to empower consumers to properly recycle products. As a member of the Sustainable Packaging Coalition® and the How2Recycle® program, Novolex is one of the forward thinking brands that strives to lead the way by instituting a labeling program for stock products to better identify materials and recycling opportunities. The How2Recycle label represents a standardized system that clearly communicates recycling instructions to the public. Novolex also partners with customers to include the appropriate How2Recycle label on their products.

# Specialty Packaging

## Custom Packaging Design

If you can think it, we can make it. From Concept to Completion, our engineers and in-house design team work with you to seamlessly develop the product that is right for your application. Therefore, if we do not have a product that fits your needs, we can develop an innovative custom product complete with custom embossing that will result in your distinctive branding success.

Our customization process below shows how we work with you to design the best packaging to meet your needs and satisfy your customers.

### Concept to Completion® in 6 Steps

#### Let's Talk

We will meet with you to better understand your goals and discover how we can develop a custom product that meets your business needs.

#### Let's Collaborate

Our in-house design team will hand draw some possible solutions, get your input and revise as necessary.

#### Let's SEE

Working off the sketches, our design team will create a dimensionally accurate digital model.

#### Let's Get Real

Using the computer renderings, we'll create a physical model using rapid prototyping technology to provide a real-life example of shape, size and user experience.

#### Let's Give it a go!

When the initial design is perfected, we'll create functional samples of your product out of the actual materials. At this stage we'll test for things like strength, lid-fit and leak resistance.

## Custom it With Embossing

Embossing can help you deliver maximum impact to your brand. POLAR PAK containers are available for embossing that brings additional awareness to your company. Embossing adds appeal and encourages the customer to reuse the container.

### Embossing Examples

# Specialty Packaging

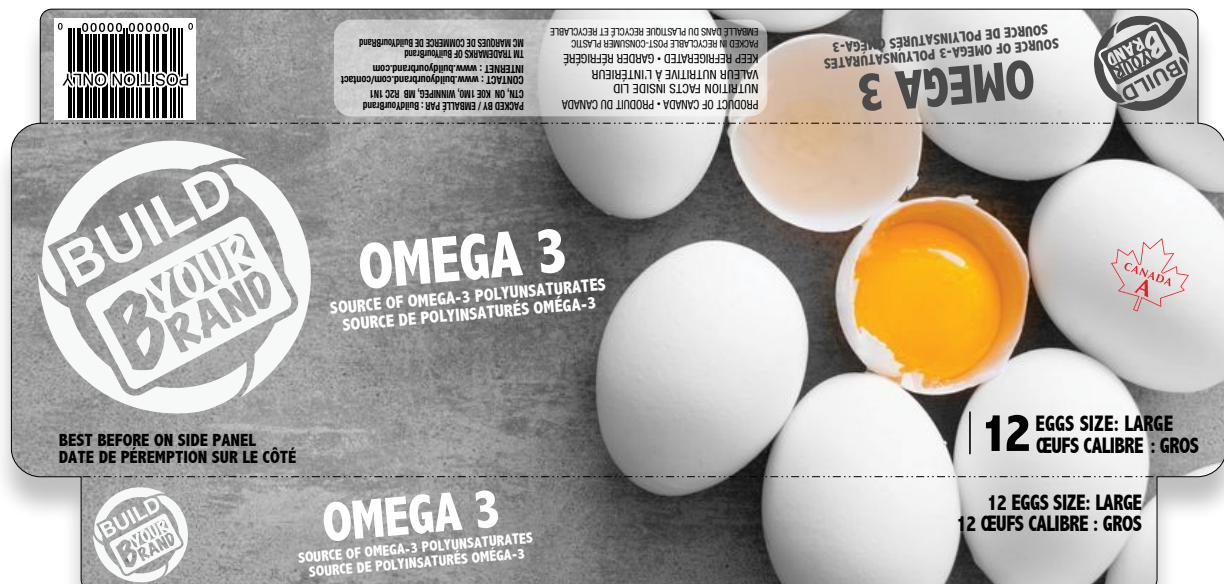

## Let Us Label it.

Decrease your labour costs and use our customized pre-labeling service. We can print the label for you or you can supply us with your printed labels; either way, we will apply it to your package.

Our goal is to help you run a seamless business - go ahead take out the worry of labeling and let us do it.

A few label examples are show below. If you don't see a label you need, just ask us.
